2ª EVALUACIÓN

Nombre y Apellidos.....

DNI.....

CURSO 2024/2025

ACTIVIDAD 1. Complete the dialogue about technology and devices.

Notebook	Earphones	Pendrive	E-reader	Smartphone
----------	-----------	----------	----------	------------

A: Do you read digital books?

B: Yes, I love reading digital books. I often read them on my _____, which is a device to read books. How about you?

A: I prefer reading them on my _____ when I'm on my way to work on the train. I can also put on my _____ to listen to audio books!

B: I see, that's useful too. When I'm on the train I prefer using my _____ - it's like a small laptop. I can save my digital books on a _____ and it also lets me work on my job documents.

ACTIVIDAD 2. Complete the dialogue about the environment.

Deforestation	Recycle	Global warming	Pollution	Alternative energy
---------------	---------	----------------	-----------	--------------------

A: Have you heard about _____? It is the rise in the temperature of the Earth and it has become a big problem for the environment.

B: Yes, I have heard about it! It is one of the consequences of _____, which creates carbon dioxide, right? Moreover, it doesn't help that we are dealing with _____, too, killing so many trees and forests!

A: That's right. This is the reason why it's so important to _____ - if we reuse items and materials, we can still save the Earth! We can also use _____ instead of fossil fuel to stop global warming.

ACTIVIDAD 3. Read the text and answer the questions.

Preventing Natural Disasters

Natural disasters that occur because of the movement of Earth's plates cannot be prevented, but some others may be preventable. Protecting the environment, for example, may prevent disasters such as avalanches and landslides. Trees on

hillsides help keep snow and soil in place. If too many trees are cut down, then avalanches and landslides are more likely to happen. Flooding can be prevented in some places by strengthening a river's edges, building dams, and redirecting floodwater away from towns.

Reducing the Effects of Natural Disasters

The effects of natural disasters can be reduced in two main ways. Warning systems can tell people to prepare for a disaster, and relief agencies can help deal with the problems caused by the disaster.

Sensible planning can also prevent deaths from natural disasters. For example, people can choose not to build towns on the sides of volcanoes, in active earthquake zones, or on floodplains.

1) Answer the questions about the text.

- What types of natural disasters can be prevented?

- How can we prevent floods?

- What are two ways to reduce the effects of natural disasters?

- Why is sensible planning important?

2) Search information about recycling in Spain and answer the questions.

-How much rubbish in Spain is recycled?

-What materials can you recycle in Spain?

-Why is it important to recycle?

3) Now write a short text about the importance of recycling.*

*En la actividad 3 se valorará la originalidad del texto presentado. Cualquier copia parcial o total de páginas como Wikipedia, traductores y otras similares se considerará plagio y será penalizado con 0 puntos en la actividad.
